HENRI TRESOR SHIMWAMANA
FULL-STACK SOFTWARE ENGINEER
+250 795 472 093 | shimwamanahenritresor@gmail.com

PORTFOLIO | **GITHUB**

PROFILE

Full-stack software engineer who designs and builds applications for business operations, financial services, and accessibility. Experienced in turning user requirements into practical web and mobile workflows, from interfaces and APIs to data integration and deployment.

TECHNICAL SKILLS

Frontend React, Next.js, React Native, Vue.js, Tailwind CSS
Backend Node.js, NestJS, Spring Boot, Django, FastAPI, REST APIs
Data PostgreSQL, MySQL, MongoDB, data modeling
Delivery Git, Docker, CI/CD, authentication, testing, deployment

PROFESSIONAL EXPERIENCE

Software Developer | CB Link **2026–Present**

- Develop features across the Melo business platform, Melo Quick, and Items Center, covering business workflows, user interfaces, APIs, and service integration.
- Build role-based screens and access controls that help different users complete their tasks clearly and securely.
- Diagnose and resolve data synchronization issues across services, and maintain features through development and release.

Software Engineer Intern | Vision Storage Facilities & Green Fresh Growers and Rwanda Stock Exchange **2025**

- Designed and built internal tools for agricultural and storage operations, including worker records, payment reports, and administrative requests.
- Worked with staff to understand daily processes and translate them into usable web workflows with appropriate access controls.

Freelance Full-Stack Developer | Remote **2022–Present**

- Delivered web and mobile applications for clients, from requirements and implementation through deployment and ongoing updates.
- Built interfaces, APIs, and data workflows while maintaining code and resolving issues after release.

Brainiacs Mentor | Rwanda Coding Academy **2023–2025**

- Led programming sessions and supported students as they developed projects and collaborated on code.

SELECTED PROJECTS

SHISHA | Farm management platform

- Designed and built a platform for farm owners and supervisors to register workers, record completed work, calculate wages, review entries, and generate payment sheets.
- Included daily rates, piecework, deductions, and external payments, alongside requisitions, labour planning, permanent staff records, expenses, invoices, salary reports, and attendance.

VERBA | React Native, Expo, Supabase, FastAPI

- Built a multilingual mobile app for recording conversations and reviewing history, with authentication and backend services.

CONEXUS | Next.js, React Native, Node.js, Unity

- Built mobile and web experiences to improve digital access and physical navigation for people with disabilities, including 3D navigation.

EDUCATION & TRAINING

High School Degree in Software Engineering | Rwanda Coding Academy | 2022–2025
Software Engineering Programme | ALX (Remote) | 2023
